

Technical Information

TM 315-25

GROB G 103

"TWIN II"

Subject: Installation of "whiskers" for training of spinning for sailplanes with certification in Australia.

Effectivity: Sailplanes GROB G 103 "TWIN II", beginning from serial no. 3501

Accomplishment: Optional modification for Australia.

Reason: The authorities in Australia wishes the following modification for training sailplanes with permission for spinning.

Instructions:

- 1.) Change in the Flight Handbook GROB G 103 "TWIN II" published December 1980 the pages 4 and 18a dated January 1984.
- 2.) Installation of whiskers according to drawing no. 103B-7201/7202 "Entenflügel links/rechts".

Weight and Balance: The weight of whiskers has no influence in flight conditions.

Remarks: The correct action has to be certified by an inspector of the manufacturer. In case of later installation the proper execution by an authorized personnel must be certified and approved by an competent authority in the aircraft's logbook.
